Army worms

Chinch bugs

Spittlebugs

Mole crickets

Grubs

Treatment:

Army worms & Mole Crickets - Grub Free Zone or Bug Blaster

Chinch bugs & Spittle bugs - Grub Free Zone

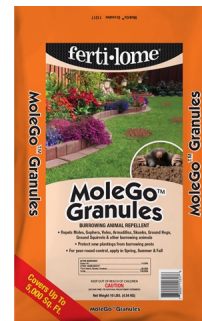

Grubs - Grub Free Zone

LAWN PROBLEMS CHEAT SHEET

How to get rid of voles and moles:

Remove the top layer of soil to expose active tunnels. Put milk jug caps on the edge of the tunnel opening and fill it with ammonia. Lay a plastic bag over the hole you dug to expose the tunnel. Use dirt to seal around the edges so that the fumes stay in the hole and go through the tunnel. It may kill or run them out. Keep an eye out for new tunneling. Repeat as necessary.

Another method is applying *Mole Go* on a monthly basis.

How to treat weeds in the lawn:

Broadleaf weeds - **Weed Free Zone** by Fertilome is safe on common southern lawns and will take care of common weeds.

Chamberbitter - **Bayer Season Long Weed Control** has a weed killer and the pre-emergent in it recommended by Clemson.

Grassy weeds - Be careful! Some grass killers will kill Centipede and Zoysia but not St. Augustine or Bermuda. Read the label, especially the fine print.

PRODUCT FOR <u>GRASSY WEEDS</u>		Controls the following Weeds:	Centi-pede	Zoysia	St. August-ine	Bermu-da
		Kills Poa Annua Crabgrass Sand- spur & others; also includes pre- emergent	Yes	No	Yes	No
		Kills Crabgrass & others	No	Yes	No	Yes
		Suppresses Nutsedge and other grassy weeds; also in- cludes pre-	Yes	Yes	Yes	Yes

WHEN USING CHEMICALS ALWAYS READ THE LABEL THOROUGHLY AND PAY ATTENTION TO TEMPERATURE REQUIREMENTS.
